# **Special Issue**

# From Disaster Resilience to Sustainability: Finding the Path

# Message from the Guest Editors

This Special Issue is dedicated to applying a multi- and transdisciplinary lens of system dynamics to the problem of disaster resilience as a key component of sustainability, with a particular focus on research and scholarship that has policy and program relevance. This Special Issue emphasizes the need to consider environmental, social, demographic, economic, and psychological determinants of disaster resilience. It also stresses the importance of understanding resilience as a problem of geospatial and temporal scales and crossscale dynamics. Papers are specifically invited that make use of panel data, longitudinal series, or case studies to either elucidate the relationship between resilience and sustainability or to investigate the effectiveness of resilience-strengthening efforts on multidimensional social and ecological outcomes. Manuscripts that address costs and equitable financing of disaster resilience will be particularly policy-relevant. Diversity of investigation scale is welcome when it has implications for scalable and sustainable change.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
