

Special Issue

Disaster Response and Preparedness in South Africa during the COVID-19 Epidemic

Message from the Guest Editor

It has been a year and a half since the COVID-19 pandemic first emerged, and its consequences still continue to be felt today, not just in terms of the death toll, but also in the way it has changed our daily lives and routines. The COVID-19 pandemic has highlighted the existing inequalities across the world, e.g., in access to vaccines and other resources. It has also pushed back into the fore the need for coordinated action in the areas of health, as documented by the success and international collaborations achieved in the fight against other infectious diseases such as polio—another devastating virus. The nature of human existence is clearly interlinked with the surrounding environment, and its very sustainability might be at stake. The lessons learnt today in the sustainability space will be crucial to tackling complex disasters such as COVID-19. The current Special Issue invites contributions from authors in South Africa and their collaborators on the sustainability of health and other solutions which have been created or identified during the COVID-19 pandemic. We look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
