Special Issue

Digital Transformation Applications in Construction and Engineering

Message from the Guest Editor

Successful achievement of increased quality and competitiveness in the construction field will depend on how digital transformation is applied to construction engineering in the future. Successful achievement of increased quality and competitiveness in the construction field will depend on how digital transformation is applied to construction engineering in the future. The technologies of relevance include but are not limited to a) unmanned arial vehicles for surveying. quality assessment, and project progress monitoring; b) remote sensing methods such as light detection and ranging for practical surveying; c) point cloud-based surveying data creation; d) building information modeling (BIM)-based design and engineering; e) various sensing technologies to improve job site safety; f) artificial intelligence (AI)-based project risk detection; g) automated schedule monitoring and progress evaluation based on a digitalized planned schedule; h) text mining and natural language processing (NLP)based project document review, evaluation, and compliance checking; i) digitalized design and engineering data-based project workflow reengineering.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
