# Sustainability toward a Climate Resilient World: Strengthen the Risk Management for Ecological Vulnerability

### Message from the Guest Editor

Dear Colleagues The growing anthropic influence on the dynamic and natural balance of the planet and its currently changing climate has been reported in a large amount of the modern scientific literature, converging to the consensus that the impacts in the physical, economic and social dimensions still present a strong tendency to increase in the future. The restoration and protection of natural ecosystems, as an important strategy for reducing the risk of disasters, seems to be a crucial point for the survival of humanity. Climate adaptation strategies necessarily involve the correct assessment of the health of ecosystems, as well as the assessment of their vulnerability and risk to climate change projected in different future scenarios. We invite the submission of original research articles and also comprehensive reviews, addressing research areas and climate-perspectives including the following: ecological vulnerability  
risk management  
resilient communities and strategies  
climate change adaptation  
analysis on the socio-ecological dimension of vulnerability  
anthropogenic influences on natural environments I look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
