

Special Issue

Ecological Assessment and Management Strategy for Aquatic Ecosystems

Message from the Guest Editors

This Special Issue aims to provide an international multidisciplinary platform for presenting original contributions in the field of Ecological Assessment in connection to Management Strategy for Aquatic Ecosystems. The focus is the presentation of new knowledge with the scope of effective upgrading of Water Frame Directive principles. Only good ecological assessment can provide a starting point for good water management. Some journals already cover Water Management and Ecological Assessment, but as two separate topics. Here, in this Special Issue, we would like to demonstrate the inevitable connection of these two areas in order to come closer to sustainability of waters. Papers selected for this Special Issue are subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, development, and applications.

- Ecological assessment
- Water management strategy
- Environmental sustainability
- Economical sustainability
- Biodiversity and ecosystem restoration
- Ecosystem services
- Water resources

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
