Special Issue

Regional Governance and Ecological Sustainability

Message from the Guest Editors

With the development of human society and the progress of science and technology, the continued expanding utilization of resources in terms of scale and intensity has caused environmental problems, including global climate change, biodiversity loss, environmental pollution, resource depletion, and ecosystem degradation, which threaten the sustainable development of our society. This Special Issue (SI) aims to discuss the strategic plan, technical approaches, and technological support system of ecological and environmental governance. Potential topics include but are not limited to the following:

- Theories, methods, and applications related to regional governance;
- New methods for studying the spatiotemporal process, genetic mechanism, prediction simulation, and optimal control of ecological environment;
- Innovative findings in ecological civilization construction;
- Investigation of natural resources;
- Prediction and and modeling of natural disasters;
- Environmental, economic, and social benefits of governance;
- Climate-related governance and challenges;
- Sustainable urban-rural planning and design.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
