

## Special Issue

# Ecology, Biodiversity, and Sustainable Nature Conservation Policy

### Message from the Guest Editor

The aim of this Special Issue is to collect the most recent research and proven policy or managerial approaches with the aim to create the groundwork for the sustainable conservation of nature/biodiversity. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- The assessment of the social–ecological characteristics and sustainability of national/regional protected area networks;
- Methods for nature valuation as a tool for biodiversity conservation and restauration;
- Proposed methodology for the development of management plans for biodiversity/nature protection;
- Policy and management issues with respect to biodiversity and nature conservation and ecosystem restauration;
- Transdisciplinary and novel approaches focusing on aspects of biological diversity, its conservation, and sustainable use.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
