# New Insight into the Relationship between Economic Expansion and Carbon Dioxide Emission

### Message from the Guest Editors

Despite economic growth raised living standards in most countries, it was also responsible for a dramatic increase in CO<sub>2</sub> emissions which are the most significant contributor to global warming. The issue of carbon dioxide emissions has received increasing attention worldwide, and dozens of countries and regions have already proposed “zero carbon” or “carbon neutral” climate goals. Understanding the relationship between economic expansion and CO<sub>2</sub> emissions helps governments in formulating energy policies, upgrading industrial structures and developing resources in a sustainable way.

Recently, as a result of green technological advancements, the use of renewable energy, the development of the digital economy, the increasing awareness of public environmental protection, and the nexus between economic expansion and CO<sub>2</sub> emissions have been experiencing deep change. Furthermore, new methods and tools for cause and effect identification, remarkable advances in remote sensing techniques, and the availability of micro firm-level data can all be conducive to the investigation of the nexus between economic expansion and CO<sub>2</sub> emissions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
