Business Model Innovation for Sustainability: Bridging the Design-Implementation Gap

Message from the Guest Editors

Business model innovation for sustainability (BMIfS) has been recognised as one of the strategic options available to organizations willing to build resilient business models and seize additional value creation opportunities. Although BMIfS design has not been an issue, organizations often fail to implement BMIfS. Thus, Special Issue is inviting contributions on how organizations perform BMIfS and under what conditions the design-implementation gap of BMIfS can be bridged. This Special Issue will publish high-quality empirical and theoretical papers on BMIfS challenges, strategies, processes, and impacts.

- business model
- innovation
- sustainability
- design-implementation gap

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
