Special Issue

Economic Recovery and Prospects in a Post-COVID-19 World

Message from the Guest Editor

The outbreak of the COVID-19 pandemic has undoubtedly received a great deal of attention among academics and practitioners. As new variants of the pandemic continue to unfold, dealing with the associated uncertainties both in the short- and longterm is crucial. While the literature is currently replete with the economic consequences of the pandemic, a very limited number of studies have addressed appropriate strategies based on empirical evidence that will facilitate economic recovery from the pandemic. Thus, this Special Issue (SI) intends to publish highquality research papers that provide practical insights into the design of optimal policies for a faster recovery from the pandemic in a way that puts the global economy on the path of growth which is at least comparable to the pre-pandemic levels. Deeper analyses that offer actionable policy actions geared towards promoting greater economic prospects across countries are encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
