

## Special Issue

# Educational Spaces and Sustainability

### Message from the Guest Editors

We claim for the contributions of a large scope of professionals such as architects that have worked or will work on the design of educational spaces, teachers of all educational levels with specific spatial needs, and educational leaders involved in the improvement of quality education and school infrastructures from the point of view of the SDGs of 2030 Agenda, as well as all those researchers with original ideas on how to improve social and civic education in schools, high schools, and universities from the perspective of transforming learning spaces and the sustainability issues these imply. We encourage all these professionals to participate in this Special Issue, in order to provide modern society with a useful guide on how to create and/or transform educational spaces in order to encourage active sustainable educational practices, and consequently improve the social conscience of our future citizens on sustainability.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
