# **Special Issue**

# Electric Mobility, Sustainability, Smart Cities, Green Policies and Electric Vehicles Adoption

### Message from the Guest Editors

This Special Issue focuses on the importance of the demand side and aims to analyze and access the general acceptance of this "new" means of transportation and its domestic, personal and professional use. As such, e-mobility can be considered a hot topic as it deals with: the importance of EVs as both a toll and an asset for grid managers; the key role EVs can play in the de-carbonization of the economies: the role EVs play in relation to the possible impact on public transportation policies—with consequences, for example, for fragile socioeconomic areas and the sustainable urban transportation systems, among others. We would also like to emphasize the importance of smart cities, namely, the policy measures concerning both urban logistics and renewable energy sources. Sustainability and self-sufficiency are also important guidelines as they seek to relate the actual and current needs (and also the general perception) about EVs and the recent e-mobility trend by focusing on the need to be less energy dependent.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
