Emerging Emergencies and Sustainability: The Role of Supply Chain and Logistics

Message from the Guest Editor

The world is witnessing an unprecedented upheaval in supply chain and logistics. Economic, social, and environmental changes create conditions, amplify, and accelerate what were once one-in-a-generation events. Companies are plunged into emergency mode fighting for their survival and charting unknown territory like never before. To find a way out of recurring crises, managers need guidance on how to redeploy operational resources and build resilience to high impact events. This Special Issue stimulates debate and discussion on the latest advances in supply chain and logistics management to cope with emergent emergencies and sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
