Special Issue

Emergency-Proof Tourism: The Heritage of Industrial Archaeology in Internal Areas as a Potential for a Sustainable Tourism

Message from the Guest Editors

One of the activities most affected by the COVID-19 pandemic is tourism.

When the acute phase of the pandemic is over, it is most likely that a tourism upturn would include very different ways and kinds of tourism compared with those of the past.

It is not unreasonable to think that a more distributed tourism, in space and time, will be favored, reducing the pressure on the most congested places and extending the fruition to wider areas.

For some time now, alternative ways of tourism have been gaining importance in the tourism sector. It can be assumed that their importance will continue to grow in future circumstances.

Particular attention deserves that segment of tourism that is linked to the heritage of industrial archaeology, especially if the heritage is located in areas of great environmental interest (e.g. numerous mining sites). This Special Issue aims to collect contributions that explore the topic of the heritage of industrial archaeology in internal areas as a potential for sustainable tourism, proposing analyses, case studies, projects, evaluations, and perspectives.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
