

Special Issue

Energy Management for Sustainable Development

Message from the Guest Editors

“Energy management” has been accepted worldwide as playing a vital role in the promotion of sustainable development. Efforts to find ways to most efficiently utilize energy and to advance the use of clean and renewable alternative energy, such as solar, wind, hydro, subterranean, oceanic, hydrogen, biomass, and bio energy sources, have increasingly gained traction in the hope that a new knowledge base can be constructed for academic purposes and furthered for engineering and economic applications. This Special Issue is an opportunity for academics, researchers, policymakers, and businesspeople to present their findings from empirical research, lessons learned from practice, and opinions formed from thorough analyses of cases in energy management towards sustainable development. The Special Issue is also designed to cover at least three dimensions of the issue—policies and strategies, business and economics, and technology and industry. Cases from countries and regions all over the world, examples of energy management in the business or economic world, and applications in engineering, such as the case of electric vehicles, are all welcomed.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
