Special Issue

Energy Economics and Sustainability

Message from the Guest Editor

It is crucial for every country to promote energy efficient technologies and promote cleaner energy sources. Economics is a powerful and robust tool for analysing how policies can change human and institutional behavior to adopt such efficient technologies and cleaner energy sources to achieve sustainable energy use. In this Special Issue, the energy use is sustainable when access to energy is secured for all people while the way the energy is supplied mitigates the effects of energy use on the environment. This Special Issue is hoping to gather various studies using economics to analyze conditions to achieve such sustainable energy use and investigating an effective energy policy to achieve this goal. Papers focusing on this issue at local/national, regional or global levels are all welcomed.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
