Special Issue

Energy Efficiency and Comfort Indoor in Smart Buildings

Message from the Guest Editors

Buildings should be seen as part of a vast and articulate structure of interconnected systems which reciprocally interfere and which involve energy grids, generation from RES, energy storage and, of course, nearly Zero Energy Buildings. From this perspective, in the near future, a new sustainable and distributed energy paradigm should be established, involving all these themes. The Special Issue aims to gather high-quality papers addressing the above-mentioned topics with a particular interest in (although not limited to) methods of analysis, innovative approaches for energy performance assessment, technologies and best practices for building operation, monitoring, energy management systems and control techniques.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
