Special Issue

Efficient Energy Generation, Storage and Consumption in Sustainable Cities

Message from the Guest Editors

The human population is growing rapidly, the development of renewable energy sources in building engineering systems has become commonplace for all. However, it should be noted that certainly, not all technological solutions are yet exploited. In the sector of civil engineering, the aim is to minimize intervention and, at the same time, the impact on the natural environment. Combining civil engineering with energy, process control, and computer engineering could act on the conversion of buildings' engineering systems into smart systems. Development of DHC systems is the way to sustainable and efficient energy utilization in cities. It enables utilizing low potential (waste energy) energy sources. The sustainable integration of buildings into the environment and interaction with it, the utilization of solar and wind energy, ground heat or cooling, and the usage of precipitation for different purposes and the development of the smart cities are the main tasks of this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
