

## Special Issue

# Sustainable Zero Energy Buildings

### Message from the Guest Editors

The purpose of this Special Issue is to compile a set of papers dealing with these wider aspects of sustainability, in relation to 'zero' or 'nearly zero' energy buildings. Sustainability issues can be considered at the different building processes, from planning, design and contracting issues, to construction, commissioning, use, and maintenance of the buildings. Invited contributions include the following topics:

- 'Affordable zero energy buildings' (AZEB), including economic perspectives from building developer, construction companies, building owners, users, etc.;
- Life cycle assessment (LCA), life cycle costing (LCC), and social life cycle assessment (SLCA) for zero energy buildings;
- Occupant behavior and comfort in zero energy buildings;
- Zero energy buildings and household energy poverty;
- Predicted vs. real performance for zero energy buildings.

### Guest Editors

Dr. Patxi Hernandez  
TECNALIA, Spain

Dr. Xabat Oregi

Departamento de Arquitectura, UPV Irakasle atxikia, University of the Basque Country (UPV/EHU), 48940 Leioa, Biscay, Spain

### Deadline for manuscript submissions

closed (30 January 2021)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---
