

Special Issue

Sustainable Energy Policy and Structural Energy Reforms

Message from the Guest Editors

Irrational energy structure leads to low efficiency and high energy consumption, and ultimately leads to outstanding ecological environment problems. It is necessary to accelerate the adjustment and optimization of energy structure, and to advance the energy structural reforms. The key role sustainable energy development has reached a consensus, and priority is being given to the development of high-quality techniques for traditional energy sources and the transition to renewable, low-pollution energy sources. This Special Issue calls for a deeper discussion about energy policies that contribute to energy structural reforms for sustainable development.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Analyzing energy policy for sustainable development;
- Impacts of energy policies on sustainable energy development;
- Conceptualizing proper energy transition policies;
- Energy transition and sustainable development;
- Energy structure adjustment and optimization;
- Policy analysis for structural energy reforms.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
