

Special Issue

Technological Advancements for Global Energy Sustainability: Role of Energy Storage, Power Converter, and Control

Message from the Guest Editors

This Special Issue will focus on the recent technological advancements in the power and energy sector to accommodate the large penetration of renewable energy resources and electric vehicles. Further, it focused on new products in the microgrid/smart grid/future grid environment, storage systems, renewable energy technologies including solar, wind, and ocean wave, novel concepts, and their applications. Energy efficiency, system integration, system reliability and sustainability, fault mitigation, and optimization and control techniques are among the areas of interest.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
