

## Special Issue

# Global Energy System in Transition: Challenge Our Myths

### Message from the Guest Editors

Energy resources are critical to achieving sustainable development of our society during this period of complexity and uncertainty, of rapid population growth and global industrialization. Currently, there are many myths related to the development of the global energy system in the future. It is time to challenge our myths. The main goal of this issue is to expose the myths dealing with development of global energy system. This issue focuses on providing the reliable information required by the energy community under pressure from the changing energy situation in the world. The main topics up for discussion in submissions include but are not limited to the following: (1) Global energy demand in the nearest 30–50 years. (2) Do we really have a shortage of fossil fuel resources? (3) Fossil fuels: can we turn the unconventional into conventional? (4) Fossil fuels and renewables: are they competitors or complementors? (5) Can we really reduce global GHG emissions by 50% by 2050?

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
