Special Issue

Entrepreneurial Environment in Rural Areas

Message from the Guest Editor

Rural entrepreneurship is an important way to increase farmers' employment and income and improve rural industries. Rural entrepreneurial environments, including the rural natural environment, social environment, economic environment and rural entrepreneurial service environment, have an important impact on farmers' entrepreneurial activities. In addition, compared with other entrepreneurs, farmers, as a special social group, are restricted by their own experience, knowledge level, and traditional perspectives, so they need more support from a sound rural entrepreneurial environment system. However, what are the components of a perfect rural entrepreneurial environment system? How can we evaluate the entrepreneurial environment in rural areas? How can we optimize the rural entrepreneurial environment? What are the "antecedents, processes and consequences" of farmers' entrepreneurial behavior in a specific rural entrepreneurial environment? All these issues are academic and practical problems that need to be solved in promoting rural entrepreneurship.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
