

Special Issue

Entrepreneurship, Competitiveness and Innovation

Message from the Guest Editor

This Special Issue will comprise a selection of papers addressing approaches and tools to understand how entrepreneurship and innovation can be good vehicles for the competitiveness. Research papers should address the multifaceted topics around entrepreneurship, innovation, and competitiveness, such as (1) education entrepreneurship, (2) ecopreneurship, (3) green innovation, (4) territorial competitiveness, and (5) open networks (living labs), among others. These topics should include the definitions of the concepts of entrepreneurship, innovation, and competitiveness, as well as the identification of factors affecting these types of phenomena. Measurement tools for assessing these three topics are also requested. Perspectives guiding the design of entrepreneurship, innovation, and competitiveness should be presented to consider when implementing public policies for increasing economic growth.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
