

Special Issue

Environmental Sustainability and Sustainable Food Production

Message from the Guest Editors

Climate change and the emergence of environmental pollution have caused significant problems in the functioning of human and ecosystem health, food production, and economics at the global level. The food industry should be of focus across the supply chain in attempts to meet the needs of the population while forgoing destruction of the environment and society. This Special Issue aims to inform the reader of advanced research of environmental sustainability and sustainable food production by inviting colleagues researching food science, food engineering, marine biogeochemistry, environmental engineering, freshwater ecology, wastewater/sludge treatment, pollutant fate, and atmospheric science to report on advanced studies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
