

Special Issue

Sustainable Environmental Governance and Natural Hazard Impact Assessment

Message from the Guest Editors

The composite assessment phase of environmental issues classifies three types of assessment indices: individual, combined, and comprehensive. They can also be classified by the impact contents to present four major elements of the living environment: safety, health, comfort, and convenience. The focus of sustainable environmental governance could be the organizing principle of sustainability and may view the terms of natural hazard impact assessment. The aim of the Special Issue is to study green governing processes characterized by the pursuit of a socioecological ideal.

Papers are invited that cover, but are not limited to, the main topics of:

- Natural resource management;
- Green computing and green chemistry;
- Environmentally friendly chemical engineering;
- Ecological economics studies;
- ☒ Soil and water conservation;
- Social impact assessment;
- Strategic environmental assessment;
- Monitoring and evaluation;
- Impact measurement management;
- Ecomunicipalities and sustainable cities;
- Permaculture, green building, sustainable agriculture;
- Circular economics, lifestyles, and ethical consumerism.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
