

## Special Issue

# Emerging Research in Sustainable Environmental Management: From the View of Human Ecology

### Message from the Guest Editors

During the past half-century, environmental management expanded into a specific research field supported by its own instruments, i.e., books, journals, conferences, and practices. At their origin, instruments for environmental management were strong in their analytical and descriptive aspects, but less so in their integrating components, providing added value by the analytical approach. During the same period, the thematic aspects of the area grew. The wider its scope, the more evident the limitations of environmental management became. The area still lacks sufficient replies to the uncertainties linked with its instruments and looks for good practice examples in new domains of application. Human ecology, targeting interdisciplinarity and integration, might be the most suitable approach for addressing the current weaknesses in environmental management. For this Special Issue, we welcome the submission of papers on methods, theory, and applications of environmental management at the frontiers of our research field. We anticipate that the works collected will point to innovation and new avenues for the years to come.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
