

Special Issue

Environmental Management Approaches and Tools to Boost Circular Economy

Message from the Guest Editors

The European Commission has just released the “Circular Economy Action Plan—The European Green Deal” focusing on the need to accelerate the transition towards a regenerative growth model. Through this Special Issue, we aim at collecting studies, both qualitative and quantitative, as well as best practices and experience descriptions which focus on the circular economy, considering all its aspects. We aim at providing a 360-degree perspective of the circular economy considering its nano (product), micro (organizations, consumers), meso (industrial parks, etc.), and macro (cities, countries, etc.) level. In addition to these aspects, we aim also at matching studies connected with the communication and measurement of the circular economy. We aim at investigating the relationship between the circular economy and its tools. In the framework described above, this Special Issue invites authors to contribute in all the aspects of the circular economy in order to provide the most comprehensive overview of this important topic.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
