Special Issue

Environmental Geography, Spatial Analysis and Sustainability

Message from the Guest Editor

In a world that is both increasingly populated and resource-constrained, while dramatically warming, human-environment interaction-related issues have become essential. Environmental geography has been examining these problems for decades. With more and more available data, whether social or environmental, as well as increasingly powerful analytical tools, the approaches and techniques of spatial analysis appear nowadays as suitable answers for handling humanenvironment-related issues. This Special Issue calls for papers that have used spatial analysis models or techniques (e.g., geosimulation, spatial statistics, geocomputation, geoviz, remote sensing, and GIS) to address sustainability-related human-environment issues. We welcome papers dealing with a wide range of topics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
