

Special Issue

Environmental Hazards: Assessing Risk and Reducing Disaster

Message from the Guest Editor

Environmental hazards such as earthquakes, tsunamis, and volcanic eruptions represent a significant risk to communities living under such threats. Having a better understanding, among others, of the physics of these events, monitoring, risk assessment and prediction, preparedness (public awareness), and disaster management systems, may help to mitigate the impact of disasters. The aim of this Special issue is to create a forum for discussion on these issues from a multidisciplinary point of view. It is hoped that this interchange of experiences, approaches, and new ideas will help to advance to the challenge of reducing disaster risk. Effectively, achieving this will make vulnerable communities' development sustainable.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
