

## Special Issue

# Environmental Management and Health and Safety

### Message from the Guest Editor

This Special Issue aims to publish papers related to environmental and security management problems in various types of organizations (both private and public). We expect articles discussing new problems and issues related to standardized management systems (e.g., according to ISO 14001, 45001, 51000, 27001) and integrated systems. We are interested in studies on psychological and sociological aspects (e.g., pro-environmental behavior) as well as typically economic aspects (e.g., costs of undertaken activities). Articles on new problems (e.g., smart ecosystems, environmental awareness) will be appreciated. The concept of security should be understood very broadly, as personal security, cyber security, data security, knowledge, supply chain, etc. All publications must be related to sustainable development.

### Guest Editor

Dr. Marek Bugdol

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
