Environmental Protection: “Doing Good and Avoiding Bad”. A Multi-Disciplinary Thinking to Change Our Minds

Message from the Guest Editors

This call for papers explores the relationship between environmental issues and human behaviour in a social context. Social sciences applied to environmental research are not purely theoretic fields but rather include much applied theory and research on how people think about and respond to environmental challenges (to give some examples: water shortage, energy demand, global warming, food security, or waste management).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
