## **Special Issue**

# Environmental Toxicology and Risk Assessment

## Message from the Guest Editors

At present, the environment is becoming fragile due to intensive human activities. We face various challenges from air and water pollution, marine plastic litter pollution, excessive solid waste around cities and villages, climate change, and others. These challenges threaten ecological integrity as well as human health. The present Special Issue focuses on the topic of Environmental Toxicology and Risk Assessment, including the toxicological effects and responses, molecular mechanisms, toxicological pathways, and potential ecological/health risks in organism exposure to various pollutants, particularly these emerging pollutants in all environmental compartments. We welcome submissions in the form of original research articles, short communications, comments, and reviews. We encourage new theories, analytical methods, and risk assessment frameworks. Particularly, novelty is the most important. Our efforts should contribute to understanding the environmental fates of various pollutants and filling in the present knowledge gaps. These works should provide unique perspectives and could be used as a meaningful reference for other researchers and scientists.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
