

Special Issue

Equality, Diversity and Inclusion in STEM for a Sustainable Future

Message from the Guest Editors

There is evidence that diversity plays a crucial role in both companies and academia related to the science, technology, engineering, and mathematics (STEM) fields. Ensuring diversity becomes crucial for the recruitment steps into STEM studies and careers.

Evidence suggests that the number of women resigning from technological job positions remains unacceptably high. For example, in western countries, only 20% or less of graduating engineers are female, and often fewer than 10% are part of the engineering workforce. To increase diversity, equality, and inclusion in STEM education, many different approaches can be implemented at different levels and to different target groups. This Special Issue aims to address mainly research related to:

- Theoretical insight into the reasons for this imbalance;
- Empirical evidence, experimental approaches, and best practices of recruitment and retention in STEM education;
- Ideas and policy to support gender balance careers in a STEM context.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
