

## Special Issue

# Developing (Transformative) Environmental and Sustainability Education in Classroom Practice

### Message from the Guest Editors

Children today face significant challenges in response to living in a globalised world and the impact of environmental threats to the planet, for example climate change, rising inequalities, and food and water security; as such, there is an increasing need for schools to have a global rather than merely local perspective and to cultivate in students a critical sense of environmental and social responsibility. Environmental and Sustainability Education (ESE) in schools is frequently promoted as a route to achieving this as it has the potential to empower learners to 'develop the necessary knowledge, understanding, skills, values, capabilities and dispositions to respond to the complex socio-ecological issues of the 21st century'. In order to develop effective ESE pedagogies, some educators look to transformative learning theory to encourage learners to move beyond simple acquisition of knowledge to a change in world-view. With this in mind, the purpose of this special issue is to explore the pedagogy and practice of ESE in schools, with a particular focus on transformative pedagogies.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
