

Special Issue

Supply Chain Sustainability Risk in Changing Demography and Technology

Message from the Guest Editors

Industry 5.0 brings a personal human touch to the Industry 4.0 efficiency. With the rapid development of technologies and thus the rapid technical obsolescence of products and tools and the rapid ageing of workers, supply chains are also becoming more vulnerable.

Therefore, this special edition seeks to address the interaction between the rapid development of technologies and the rapid ageing of the population.

Topics may include, but are not limited to:

- Changes in the production and supply chain design due to the Industry 4.0;
- Innovative Industry 5.0 concepts and approaches;
- The impact of fast technological development on production and SC exposure to risk;
- Ageing of human resources, sustainability of industrial and social systems, and policies;
- Adapting the production and services to the ageing of buyers;
- Integrating assistive and collaborative technologies in decision support modelling;
- Optimization and simulation approaches for designing and coordinating operations in global supply chains;
- Investments that are improving processes should be the subject of industrial engineers

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
