

Special Issue

Failures and Perspectives of Technological Applications and Processes after the COVID19. Defense and Development of Methodologies

Message from the Guest Editors

Reducing the social and economic effects on the world population in these COVID-19 times requires research and analysis from various diverse fields.

One of the main challenges is represented by the recovery and, therefore, the development of forecasting models to avoid the vertical fall of the economy and industrial activity.

The aim of this research is to put together a series of scientific papers which report on the important actions undertaken to evaluate the effects of COVID-19 and to promote methods and prospects toward more sustainable living conditions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
