Special Issue

The Future of Food and Feed Based on Agriculture 5.0: Latest Advances and Prospects

Message from the Guest Editors

Nowadays, the information available in agriculture can contribute to making cost-effective solutions only when managed efficiently. Improving data management can influence smart agriculture to grow very fast as data have become a key element in modern agriculture. In this regard, this Special Issue is expected to address the following topics: - Data management and smart agriculture; - Contemporary achievements in agriculture and food and feed production; - Link between food and agricultural systems; - Influence of agriculture 5.0 on sustainable food and feed production; - Social, economical and environmental impact on the whole food chain; - The role of new technologies in enabling and fostering production. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA
