

Special Issue

Food Security, Food Choices, Food Budget and Households Sustainability

Message from the Guest Editor

We are pleased to invite manuscripts on the subject of food security. Specifically, we are interested in research addressing factors associated with Food in/security at the household and child levels; food choices, food budget and household sustainability. Manuscripts focusing on the effects of policy initiatives to mitigate food in/security, and the role of race and ethnicity in explaining food in/security, are welcome. We also accept the submission of manuscripts that cover theory, empirical research, and policy analyses. Submissions can also include conceptual articles, systematic reviews of seminal literature and assessment of interventions. The issue is intended to highlight the work of leading scholars, policy makers, and practitioners involved, who are interested in the issue of food security, locally and internationally. The overall vision of this issue is to collate and build upon existing research, to better understand issues related to food security, in the hope of enhancing a stronger evidence base to create responsive programs and more effective policies and practices.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
