

## Special Issue

# Food Provision, Food Choice and Sustainability

### Message from the Guest Editors

The advent of COVID-19 has also created new challenges and opportunities in relation to providing a safe and sustainable food supply. This Special Issue covers all aspects of contemporary food provision across the food system, from the individual through to population level, in a variety of settings. This includes food production, availability, and the individual selection of foods, eating behaviors and the impact on dietary quality and health, through to the broader impact of larger scale catering, food procurement, food safety, and wastage. We invite submissions that feature stakeholder perspective or influence on sustainable food provision or food choice, the role of sustainable practices and policy on food provision and food choice, the influence of food and beverage industry and use of new technologies that promote and ensure safe and sustainable food provision.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
