

Special Issue

Sustainable Food System Transition

Message from the Guest Editor

Our current food system is unsustainable. The rapid expansion of agricultural land has caused severe damage to ecosystems and elevating global greenhouse gas emissions. Food shortage, undernutrition, unhealthy diets and malnutrition are contributing to non-communicable diseases, resulting in increased mortality rates across the world. Meanwhile, structural changes in agriculture are causing population and employment to become increasingly concentrated in urban, resulting in a widening urban–rural gap that threatens both territorial and social cohesion within countries. In order to better meet the needs of people and the planet, we urgently need a global shift toward more plant-based, resilient, and localized food systems. This Special Issue welcomes submissions that shed light on the opportunities and barriers for a sustainable food system transition in a COVID-19 and post COVID-19 world, and contribute to the development of sustainable, innovative, and inclusive food system solutions across the entire food value chain, covering production, distribution, consumption, and recycling/upcycling. Interdisciplinary and transdisciplinary contributions are encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
