# **Special Issue**

# Food Security and Environmentally Sustainable Food Systems

## Message from the Guest Editor

This Special Issue focuses on original research articles and reviews regarding food security, in terms of potential difficulties, solutions and opportunities of transitioning toward healthier dietary patterns. The Issue also aims to highlight sustainable ways/uses to: (a) apply eco-friendly processes in the food chain, (b) develop new foods' re-using of natural resources and (c) valorize food wastes and minimize food losses according to the Circular Economy principle. In this framework, studies concerning the application of new food processes, food waste disposal management, the sustainable valorization of food losses or by-products, the construction of new facilities adopting green policies to reduce energy consumption and improve efficiencies, the reuse of natural resources or low-value materials. the treatment of wastewater for its reuse and the sustainable exploitation of natural resources are welcome. We also welcome other related arguments, in the form of both specialized and interdisciplinary manuscripts.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Editor-in-Chief

#### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

## **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
