

## Special Issue

# Achieving Sustainability in the Nexus of Forest and Agricultural Ecosystems

### Message from the Guest Editors

The purpose of this Special Issue is to focus on the need to develop conservation and sustainable use actions that allow combining forest ecosystems with agricultural use. The increase in deforestation in order to use land for crops has caused fragmentation of forest habitats, in many cases preventing the movement of species. Connectivity makes genetic variability among different populations possible, and in addition to increasing the capacity to recover from any type of disturbance, it can also enhance the guarantees of survival for certain populations against possible local extinctions. For this reason, the existence of connectivity between forest and agricultural habitats is important. This Special Issue will contribute to a comprehensive understanding of the importance of connectivity analysis in a holistic manner that maximizes the full potential of its procedures as a tool for conservation. Research areas may include (but are not limited to) the following:

- Ecological connectivity;
- Species movements;
- Habitat fragmentation;
- Land use and environmental planning.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
