

## Special Issue

# Fostering Sustainability through Strategic Environmental Assessment

### Message from the Guest Editor

Over the past couple of decades scholarly debates in the literature on Strategic Environmental Assessment (SEA) have consistently advocated the important role SEA can play in promoting sustainable development, making it one of the objectives of SEA since early days.

Article 1 of the 2001/42 European Union (EU) directive explicitly states as an objective of the Directive to contribute to the integration of environmental considerations into the preparation and adoption of plans and programmes with a view to promoting sustainable development. Suggested themes include:

- SEA as an instrument of strategic change towards sustainability
- SEA enabling transition processes to sustainable development
- SEA role in helping to achieve SDG
- Fostering sustainability through SEA
- Governance rationale in linking SEA and sustainable development
- Transition from traditional to strategic thinking SEA

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
