Special Issue

Advances in Sustainable Agricultural Crop Production

Message from the Guest Editors

The intensive crop production paradigm is characterized by increased global food production. Conventional intensive crop production has focused on monocultures, intensive tillage, irrigation, use of synthetic fertilizers and pesticides. This has resulted in destruction of the natural habitats, depletion of natural resources, reduced biodiversity, degraded soils, accumulation of toxic chemical residues in foods, salinization of irrigated fields, upsurge of pests and diseases, and unpredicted weather patterns. Therefore, new approaches are required to integrate biological and ecological processes in agricultural production, reduce use of non-renewable inputs that have adverse effects on the environment, health of farmers and consumers. The Special Issue titled "Frontiers in Sustainable Agricultural Crop Production" offers a forum where researchers, scholars and professionals in agriculture can share and disseminate knowledge, innovations and experiences on sustainable crop productions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
