

## Special Issue

# Our Future Earth and Sustainable Ecological Environment and Society

### Message from the Guest Editors

Dear colleagues: The main purpose of our Special Issue is to discuss trends, driving mechanisms and interactions between environmental and social systems, and the major issues of food, water, energy and health for sustainable human development, with a focus on the interrelationship between humans and the Earth's environment as advocated by the Future Earth Initiative, incorporating human ecology. With a methodological emphasis on the intersection of the natural and social sciences, new theoretical perspectives are encouraged, and field surveys, in-depth interviews, participatory methods, experiments, remote sensing and GIS, geostatistical techniques, intelligent computing, prediction and simulation are widely used. We hope that the research findings and policy implications will help us to highlight the latest advances in the field of sustainable ecology environment and society and outline possible issues that need to be further explored to better provide a solid scientific basis and technological support for global and regional sustainable development.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
