Future Foods in the Face of Hunger and Surplus: From Sustainable Production to Responsible Consumption

Message from the Guest Editors

World food production has increased greatly in the past and secured food for millions of people around the world. However, there are still food insecurity issues in terms of either less or surplus food availability with poor quality leading to several challenges such as anemia, hidden hunger, and malnutrition, ultimately giving rise to the prevalence of non-communicable diseases. The main objective of the Special Issue is to publish original research, modeling approaches, and review papers addressing how agricultural production systems and the food industry could be implemented with a sustainable approach. Therefore, manuscripts evaluating how innovative agricultural production systems and food technology could support sustainable practices and improve food productivity, transformation, as well as conservation and the food chain are welcome. This Special Issue aims to collate recent research measures centering on sustainable crop production and responsible consumption with reduced food losses.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
