

## Special Issue

# Geographic Data Science and Sustainable Urban Developments

### Message from the Guest Editors

Cities are complex environments composed of housing markets, transportation systems, population dynamics, etc., challenging sustainable urban developments. While geographic information system-based urban analyses have reached certain levels of maturity to study cities, the capabilities and limitations of data-driven, geographic data science approaches to support urban theories, as well as policy- and decision-making, have not yet been adequately addressed. Recent technological progress led to increasing amounts of multi-dimensional data, inherently characterized by spatial and temporal dimensions. In this context, it is expected that cutting-edge data science methods linked to novel data sources promote deeper insights into urban processes in order to support urban environments for a more sustainable future. To cope with these and related challenges, the objective of this Special Issue is to publish original research and review papers in order to synthesize the discussion on the application of the latest advances in geographic data science to understand urban developments, their dynamics, and sustainability, and the underlying key mechanisms.

### Guest Editors

Dr. Marco Helbich

Department of Human Geography and Spatial Planning, Utrecht University, 3584 CB Utrecht, The Netherlands

Dr. Hichem Omrani

Department of Urban Development and Mobility, LISER, Esch-sur-Alzette, Luxembourg

### Deadline for manuscript submissions

closed (31 October 2019)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
