

Special Issue

Wetland Ecology, Conservation and Sustainability: Applications of Geospatial Techniques

Message from the Guest Editors

Wetlands are one of the most productive environments on the planet, having very high biological diversity and productivity, and providing numerous ecosystem services. In this Special Issue, we invite original contributions on any aspect of the use of modern technologies, such as Geographic Information System (GIS), Remote Sensing, Unmanned Aerial Vehicles (UAVs) and Volunteered Geographic Information (VGI), to wetland ecology, conservation, sustainability, mapping and monitoring. The contributions are not limited to just wetlands, but include the biodiversity inherent in wetlands or dependent on wetlands. Climate change impacts on wetlands and their biodiversity, forage availability for grazing animals and underground water are also encouraged. There is scope for a limited number of review papers, so if you are planning to submit a review paper then please consult us first so that we can avoid duplicates.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
