

Special Issue

Advances in Environmental Economics: Global Dynamics and Regional Economic Development

Message from the Guest Editors

Economic activities have had a high impact on habitats for centuries. Economic and environmental systems are two sides of the same coin and, consequently, they must be considered as strictly interconnected elements, with interventions being needed to optimize the use of natural resources in order to maximize wellbeing levels. An in-depth analysis of the interactions between regional growth dynamics and the overexploitation of natural resources is necessary; these relationships require the sharing of responsibilities among all the involved stakeholders. The aim of this Special Issue is to encourage new ideas regarding regional sustainable development, following the lines drawn in the UN 2030 Sustainable Development Agenda goals. In particular, this SI aims to encourage academic debate on ecological transition and to contribute to the literature on regional sustainable development. The focus is on research that may help to reduce regional inequalities, enhance social, natural and economic resources, and boost the sustainable development process.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
